TOOLING DIVISION

Kemet International Ltd is celebrating 70 years of service to Industry and Research and is considered to be one of the world's leading Companies in the field of Precision Surface Finishing. Today the Kemet Group of Companies worldwide employs 140 people all devoted to the on-going development of Precision Surface Finishing Techniques. The Group Headquarters at Maidstone, Kent is the location of their NEW enlarged Manufacturing Facility. Here products developed in their Laboratories and tested in their modern R & D Departments are produced. These products include standard and special formulations for grinding, lapping, polishing and cleaning.

The market leading Kemet Diamond Compounds are now used throughout the world with standard and special formulations being introduced regularly to meet new technology applications.

The Kemet world of Precision Finishing encompasses products and processes applicable to many diverse applications and materials. With a stock of over 12,000 products and a dedicated team of Technical Representatives, all Kemet customers are assured of product availability, service and technical support.

PRECISION FINISHING FOR 70 YEARS

CLEANING DIVISION

The Company's 70 years of steady growth is the result of its innovative approach to product development and its ability to adapt to a changing world of technology. All 4 of the Company's Divisions having something NEW for this year.

The Cleaning Division is introducing a NEW Multiwave Ultrasonic Programmable Cleaning System. This multifrequency control is critical for many components.

A NEW exclusive Agreement with Metkon means Kemet now has one of the widest ranges of Machines for cutting, mounting, grinding and polishing samples for Metallography and Petrography.

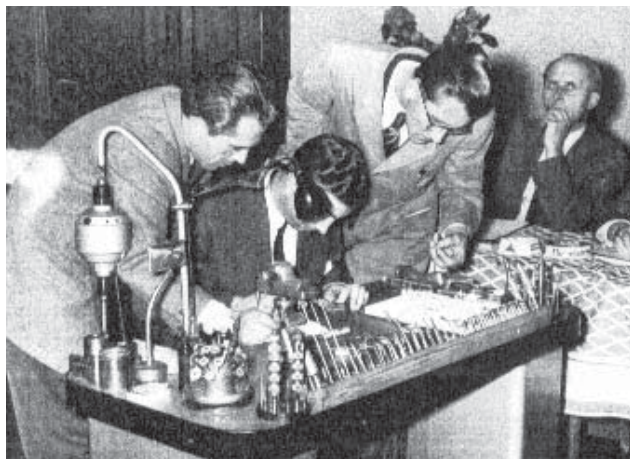

NEW for the Tooling Division is the NSK Nakanishi Sheenus NEO, a powerful and cost effective Ultrasonic Polishing System.

The Flat Lapping Division now has a NEW complete programme of Colloidal Silica Polishing Machines to complement their Diamond Flat Lapping Programme.

The future for the Kemet Organisation will continue to be technically challenging, but with 70 years of know-how and experience it confidently has 100 years in its sights.
